

"Teeth v2"

Since I put this girl or woman in  
slightly different than the original  
attempting to imitate negative images that condition looking at.  
clearly "this is wrong"  
to consume to look the best, become the best, the most loved.

I totally understand your tumult! don't worry!

these images tell us  
colored to dazzle specifications  
that can't seduce but can hijack the vision sources.  
infra and ultra appearances tell us  
hyperspace is haunted.

everybody there (hyperspace) is like [what to wear make up hair nails](#)  
all jazzed and sure and offering  
but it is the voodoo kind, a means to 'get things done'.  
spirits and material working together  
spooky stuff that becomes real, too real in the glaze of aesthetic female sexing.

visualization should be slightly scary, you are summoning a real deity.  
but careful  
when summoning  
you are asking to be touched, stirred, and shaken.

this girl or woman does not need to be made visible to be known,  
she is not a pattern or routine  
not the emission from surface, but from below  
down down down and actually attractive!

how will you know when you see her?  
if she never appears  
you will find her hanging in shade  
away from the flash.

'alright too bright to recognize'  
may it be [at that strange moment between recognizable and alien one really sees](#)  
it's a good way to take your self out of the communication part of things.

In full admiration,

Lena Daly
